

KURO-BŌ

100% natural water filter

KURO-Bō Activated Charcoal Kōins

Hand-cut from KURO-Bō Activated Charcoal sticks, KURO-Bō Kōins are designed with your health and the planet in mind – conveniently creating 100% natural and eco-friendly purified, mineralised and pH-balanced water, with a delicious and more refreshing taste, wherever you go.

Benefits of your KURO-Bō Kōins:

🌿 100% natural and eco-friendly.

🌿 Versatile and easy to use.

🌿 Reusable daily for up to three months.

🌿 Remove chemicals and heavy metals from ordinary tap water, such as chlorine, lead, aluminium, copper, iron, mercury and manganese.

🌿 Enrich water with beneficial minerals, like Calcium and Magnesium.

🌿 Remove E. coli (at 99 CFU per 100ml).

🌿 Neutralise an acidic pH.

🌿 Improve the taste and odour of tap water.

🌿 Recyclable in many innovative and eco-friendly ways.

🌿 100% of the packaging is recyclable or biodegradable.

*Ideally pair
with our Gō-Ecō
Glass Water
Bottle!*

KURO-Bō

100% natural water filter

The KURO-Bō Kōin LiFecycle

How to use your Kōins in 4 easy steps:

- 1 Remove your Kōins from the biodegradable bag and boil in water for 10 minutes. Remove and cool.
- 2 Fill your Gō-Ecō Glass Water Bottle with tap water (up to 1L) and drop in the Kōins. They will start filtering immediately, although for best results leave for 3+ hours. Lightly rinse your bottle and top up daily.
- 3 After one month of on-the-go filtered water, boil your Kōins for 10 minutes. Allow to cool, and then simply reuse every day.
- 4 After two months of daily use*, boil your Kōins again, allow to cool and reuse as before. Once filtered, if your water still tastes clean and fresh, reuse. If not, simply recycle your KURO-Bō Kōins in a number of eco-friendly ways and start the easy process over again with new Kōins.

** The lifetime of KURO-Bō Activated Charcoal Kōins depends on the water quality and daily volumes of water being purified. For greater volumes of water, simply add additional Kōins.*

WARNING: Choking hazard – small parts.

NOTE: Kōins may leave a small residue on handling, but don't require rinsing or washing. Being 100% natural, activated charcoal particles may appear in the water, but this will not compromise the efficacy or purity, and are 100% safe to ingest. Do not combine with acidic fruit.
