

KURO-BŌ

natural water filter kōins

Hand-cut from KURO-Bō activated charcoal sticks, KURO-Bō kōins are designed with your health and the planet in mind – conveniently creating 100% natural and eco-friendly purified, mineralised and pH-balanced water, with a delicious and more refreshing taste, wherever you go.

Benefits of your KURO-Bō kōins:

🌿 100% natural, eco-friendly and plastic-free.

🌿 Portable and versatile.

🌿 Reusable daily for three months.

🌿 Scientifically proven to remove chemicals and heavy metals, such as chlorine, lead, aluminium, copper, iron, mercury and manganese.

🌿 Enrich water with beneficial minerals, like calcium and magnesium.

🌿 Remove E. coli (at 99 CFU per 100ml).

🌿 Neutralise an acidic pH.

🌿 Improve taste and odour.

🌿 Recyclable in many innovative and eco-friendly ways.

🌿 100% of the packaging is recyclable or biodegradable.

*Ideally pair
with our gō-ecō
glass water
bottle!*

KURO-BŌ

natural water filter kōins

The KURO-Bō kōin liFecycle

How to use your kōins in 4 easy steps:

- 1 Remove all kōins from the biodegradable packaging and boil in water for 10 minutes. Remove from the water and cool. Sign up online for monthly activation reminders.
- 2 Fill your water bottle with tap water (up to 1L) and drop in all the kōins. They will start filtering immediately, although for best results leave for 1 – 2 hours (550ml) or 2 – 3 hours (1L). Top up as required.
- 3 After one month of on-the-go natural mineral water, boil your kōins for 10 minutes. Allow to cool, and then simply reuse every day.
- 4 After two months of daily use*, boil your kōins again, allow to cool and reuse as before. After 3 months, simply recycle your KURO-Bō kōins in a number of eco-friendly ways and start the easy process over again with new kōins.

** The lifetime of KURO-Bō activated charcoal kōins depends on the water quality and daily volumes of water being purified. For greater volumes of water, simply add additional packs of kōins, or consider using a KURO-Bō stick.*

WARNING: Choking hazard – small parts.

NOTE: Kōins may leave a small residue on handling, but don't require washing. Being 100% natural, activated charcoal particles may appear in the water, but this will not compromise the efficacy or purity, and are 100% safe to ingest. Do not combine with acidic fruit. Images for illustration purposes only.

Visit www.kuro-bo.com for more information, to order new KURO-Bō activated charcoal sticks, kōins, gō-ecō natural brushes, carafes, dispensers and gō-ecō glass water bottles, or to sign up for monthly activation reminders.
